Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 2-6, 9-18, 20-24, 27-42, and 44-45 are objected to because of the following informalities. Claim 27 recites “the cartridge frame comprising: a developing roller”; however, the frame does not include a roller. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 46 is rejected under 35 U.S.C. 102(b) as being anticipated by Enoki (JP2001-83858A).

Enoki teaches a process cartridge (figure 4), comprising: a cartridge frame 100b; a photosensitive body 12; a developing roller 18, facing the photosensitive body 12; a container 16, provided inside the cartridge frame, that contains a developer, the developer being supplied to the developing roller; and a first elastic element 200, formed of a rubber material [0010], that

Art Unit: 2852

is transformable between a first original shape and a first transformed shape, the first elastic element connecting the photosensitive body and the cartridge frame.

Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamaguchi et al. and Arimitsu et al. teach pertinent prior art.

Allowable Subject Matter

5. Claims 48-50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims are 2-6, 9-18, 20-24, 27-42, and 44-45 contain allowable subject matter.

Response to Arguments

7. Applicant's arguments with respect to claim 46 have been considered but are moot in view of the new ground(s) of rejection.
